OBJECTIVE

With the growing demands of research in the field of language and literature, my objective as a teacher is, to educate students the artistry and utility of the English language through the study of literature and to provide students with the critical faculties necessary in an academic environment, on the job, and in an increasingly complex, interdependent world. To encourage students who are capable of performing research, analysis, and criticism of literary and cultural texts from different historical periods and genres to produce significant valuable researches and assist them in the development of intellectual flexibility, creativity, and cultural literacy so that they may engage in life-long learning.
