## PROJECTS

### Online Food ordering system

09/2023 - 01/2024 Location

Online Food ordering system(Final Year Project)

Developed a comprehensive web-based project titled "Online Food ordering system" during the final year of my education.

Utilized HTML, CSS, PHP, and other relevant technologies to create a dynamic and user-friendly platform for managing food ordering activities.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

### Online Gym Management system

09/2022 - 2022 Location

Developed a functional "Gym Management System" using Object-Oriented Programming (OOP) principles in C++.

- What was a successful outcome of your work? (e.g. Raised \$3,000 for the charity)

## PASSIONS

- 💎 Enthusiastic about building responsive and user-friendly web applications.
