

**NATIONAL UNIVERSITY OF MODERN LANGUAGES
(ADMINISTRATION BRANCH)**

No. ML.10-4/2000-Admn-

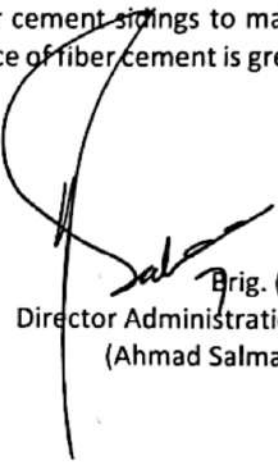

Dated: 09-09-2021

Subject: **Planning Development – New Building Standards**

It has been decided since 2019 that we will go for energy efficient building structures in all future infrastructure developments.

- We will upgrade our existing buildings to have higher energy efficiency and we are currently working on that.
- We plan and work on energy efficiency through efficient energy consumption through various measures.
- We constantly monitor the infrastructure which are less energy efficient and wasting energy.
- University is opting for sustainable materials like fiber cement sidings to make its building weather and fire resistant. The fire resistance of fiber cement is great for the safety of the buildings.
