

National University of Modern Languages Department of Electrical Engineering Internee Feedback

On The Outcome-Based Education (OBE) For Attaining Program Learning Outcome (PLOs)

(To be filled by the Manager of a place of Internship)

NUML has embraced the Outcome-Based Education (OBE) philosophy, which prepares graduates to meet the expectations and challenges of a professional career in the industry. The internship program is a learning experience for students because it enables them to apply classroom theory to real-world industrial processes and technology. This feedback enables us to assess our teaching-learning processes and identify areas for improvement to better prepare our students to meet industry requirements. As such, your assessment of our student(s)' performance and behavior during their internship with your organization is requested.
